

Benefits, Care & Cleaning of Thibaut's Pinnacle Collection

Pinnacle is a collection of Crypton Home fabrics for residential interiors that combines performance attributes with sumptuous color and a soft feel. Created for family-friendly living, Crypton Home is designed to meet or exceed heavy-duty requirements in every performance category. It provides homeowners and designers with an indoor fabric that is both durable and stain resistant without sacrificing style, softness, and breathability.

SUPERIOR STAIN REPELLENCY Spills bead up. Stains are easy to clean. Odors don't cling. Fabrics remain breathable. This technology also inhibits growth of bacteria. Unlike other after-market treatments that can affect the hand and color of fabrics with varying levels of success, Crypton Home is inherent to the construction of the fabric. Each fiber of Pinnacle fabric is encapsulated with Crypton Home's technology during the development process. This protection is custom engineered to provide the best performance possible for the specific fibers and weave of each fabric, resulting in a long-lasting easy-to-clean fabric.

TESTED, TRUSTED AND PROVEN TECHNOLOGY Backed with 23 years of expertise in performance textiles, Crypton is known for providing reliable, environmentally friendly and easy-to-clean fabric technology. Crypton technology was initially developed to meet the needs of the extreme challenges found in hotels, hospitals and healthcare facilities. Not every situation demands so much from its fabric. As a result, Crypton Home was developed to provide a soft and beautiful upholstery solution with extraordinary performance for residential applications.

EASY TO CLEAN Most liquids simply roll off or can be blotted off the surface with a dry towel. For thicker substances, use a spoon to remove excess so the stain is not pressed further into the surface.

CLEANING CODE = W (water with mild enzyme detergent, see instructions below) *The use of solvents is not recommended. Do not dry clean.*

SPOT CLEANING The spot cleaning method of stain removal can be used for most light to medium stains, such as coffee, red wine, crayon and ketchup. Be careful to brush lightly since fibers can be broken or matted in the cleaning process.

1. Before spot cleaning, blot up liquids on the surface with a clean, soft towel. For thicker substances, use a spoon to remove any excess.
2. Mix 1 tsp of an enzyme detergent such as Tide® laundry detergent or Dawn® dishwashing detergent with 16 oz. of warm water and mix well.
3. Apply the cleaning solution using a misting spray bottle.
4. Use a soft brush to work the solution into the affected area. Make sure to work from the outside of the stain inward so as not to spread the stain. Rinse your sponge or brush frequently.
5. Rinse thoroughly with water to remove all soap residues since soap attracts dirt.
6. Blot excess moisture with a clean, soft towel or sponge.
7. Repeat steps 3-7 (spray, brush, rinse, blot) as needed.
8. Allow fabric to air dry.

STUBBORN STAINS Using their expertise in fabric technology, Crypton has created a line of strong, environmentally conscious, effective cleaners for upholstery. Water-based and ready-to-use, Crypton Cleaners are designed to easily break down tough stains. Visit Crypton.com for additional information on how to purchase these cleaners.

GENERAL CARE We recommend periodic cleaning of upholstered surfaces with hot water extraction. This method of stain removal can be used for most medium, ground-in stains and general maintenance. The use of solvents is not recommended. Visit Crypton.com for detailed instructions.

NOTE: Use light steam to remove wrinkles. Do not iron. Do not dry clean. The use of bleach is not recommended on Pinnacle fabrics. Some stains, such as permanent marker, lipstick and nail polish may not be completely removable.

NATURAL FIBERS RETAIN SOFT FEEL Crypton Home offers performance characteristics on your favorite yarns such as cotton, linen and rayon without sacrificing the fabric's unique characteristics. With Crypton Home, fabrics are not limited to the use of a single fiber to achieve their superior level of performance.

LONG-LASTING DURABILITY Most patterns meet or exceed 30,000 Wyzenbeek double rubs. All patterns pass California TB 117-2013. In addition, all fabrics must pass rigorous tests for pilling, stain and water resistance, flammability, and resistance to bacterial growth. Crypton Home is inherent to the construction and development of each textile and will not wear away.

NOTE: Pinnacle fabrics are not recommended for outdoor use.

ENVIRONMENTALLY FRIENDLY Crypton Home technology:

- passes CA Standard Section 01350 for indoor air quality
- is GREENGUARD Gold® Certified, helping to create healthier, more sustainable indoor environments
- uses Silver Ion technology that naturally deters the growth of bacteria
- is free of harsh or harmful chemicals
- does not affect its ability to be recycled

ENGINEERED AND WOVEN IN USA

All Crypton development and processing occurs in state-of-the-art, environmentally responsible facilities in North Carolina. In addition, all research and patented chemical formulations are developed and made in the USA.
